Tips for Effective Searches

Tip #1: Enter one keyword per search field rather than phrases or multiple words separated by spaces or commas.

Tip #2: Do not use quotation marks, asterisks, percent signs or other "wildcard" characters when entering search criteria.

Tip #3: This description search queries TESSCO.com's product database verbatim based on the keyword criteria you enter. Begin your search by entering entire words into the search fields (example: "antenna"). If your search on a whole keyword does not meet your expectations, then try word fragments instead (example: "ant" for "antenna").

Tip #4: It is better to put one word in each box rather than two or more in a single box.

Tips for Effective Searches
